

# National Health and Nutrition Examination Survey

## 2013-2014 Data Documentation, Codebook, and Frequencies

### Mental Health - Depression Screener (DPQ\_H)

Data File: DPQ\_H.xpt

First Published: March 2016

Last Revised: NA

#### Component Description

A nine-item depression screening instrument, the Patient Health Questionnaire (Kroenke and Spitzer, 2002; Kroenke et al., 2001) was administered to determine the frequency of depression symptoms over the past 2 weeks. A follow-up question assessed the overall impairment of the symptoms. Response categories for the nine-item instrument "not at all," "several days," "more than half the days," and "nearly every day" were given a point ranging from 0 to 3. The instrument incorporates DSM-IV depression diagnostic criteria (Spitzer et al.1999). The variable prefix is DPQ.

#### Eligible Sample

Mobile Examination Center (MEC) participants 12 years and older were eligible. Only data from participants aged 18 and older are included in this data file. Participants requiring a proxy were not eligible because of the sensitive nature of the questions.

#### Interview Setting and Mode of Administration

The questions were asked at the MEC, by trained interviewers, using the Computer-Assisted Personal Interview (CAPI) system as part of the MEC interview. Proxy respondents were not permitted for this section.

#### Quality Assurance & Quality Control

The CAPI system is programmed with built-in consistency checks to reduce data entry errors.

#### Data Processing and Editing

Edits were made to ensure completeness, consistency and analytic usefulness of the data.

#### Analytic Notes

A total score is based on the sum of the points in each item ranging from 0 to 27. Major depression and depression severity can be assessed using pre-defined cut-points References).

Data for youth aged 12-17 years are available through the NCHS Research Data Center only.

The NHANES full sample 2-Year MEC Exam Weights (WTMEC2YR) should be used to analyze the 2013-2014.

Please refer to the [NHANES Analytic Guidelines](#) and the on-line [NHANES Tutorial](#) for further details on the use of sample weights and other analytic issues.
